WebDriver (Selenium 2) API documentation [closed]

I can't locate an official **class/method/properties** type API reference for WebDriver anywhere, only the 5 minute guide and `Next Step` pages located at seleniumhq, plus a few other haphazard descriptions. Does one exist?

api   selenium   documentation   webdriver

closed as off-topic by Martijn Pieters ♦ Jun 4 '15 at 7:50

This question appears to be off-topic. The users who voted to close gave this specific reason:

- "Questions asking us to **recommend or find a book, tool, software library, tutorial or other off-site resource** are off-topic for Stack Overflow as they tend to attract opinionated answers and spam. Instead, describe the problem and what has been done so far to solve it." – Martijn Pieters

If this question can be reworded to fit the rules in the help center, please edit the question.

4   Thank you! They should set up a selenium test to see if it's possible to find a link to this documentation easily...LOL – artfulrobot May 8 '13 at 14:58

---

4   Voting to reopen because this question does not actually ask to "find a [as in, any suitable] book, tool, software library, tutorial or other off-site resource". It asks to find *the* (this unique particular) off-site resource, that is, the official API reference documentation for this one library. – minopret Aug 31 '15 at 10:52

Correct minopret - as stated, I was after the official documentation which, showed it did not attract opinionated answers but links to the official documentation. – jontyc Sep 15 '15 at 3:15

7 Answers

There are javadocs here, rubydocs here, python docs here, .NET docs here, and documentation for WebDriverJS (JavaScript) here.

20   Ah good, thank you. I have no idea Selenium don't put these links on their documentation page (or if they're there, made easily findable). – jontyc Apr 13 '11 at 6:08

---

4   Google code project is code.google.com/p/selenium. If you need any of the other language docs. – James McMahon Nov 8 '11 at 19:33

4   Thank you. Why is it so hard for developers to link to documentation on their homepage? After minutes
     searching and finding nothing of value on seleniumhq, Googling brought me here... – Cerin Oct 29 '12 at
     18:14

1   The project recently moved to Git, so these links point to old versions. `s|/svn/trunk/|/git/|` , as can
     be seen in the new links at code.google.com/p/selenium. – Tim Yates Apr 17 '13 at 20:12

8   After searching for the JavaScript docs everywhere (to no avail) we decided to generate them:
     appfigures.github.io/webdriver-js-api-reference – oztune Jan 30 '14 at 6:14
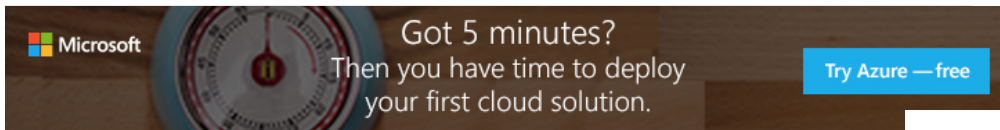

The official Python API docs are here:
http://selenium.googlecode.com/svn/trunk/docs/api/py/index.html

They're no longer missing the classes that James mentioned in his previous comment.

There's also an unofficial set of python docs here: http://readthedocs.org/docs/selenium-
python/en/latest/index.html which is more of a walkthrough.

The Javascript Bindings are well commented, but it seems that nobody bothered to generate
some html documentation from them. Anyway, browsing the code and reading the comments
was helpful at some point of time, although there seem to have been a few changes since
then. Anyway, the code can be found here:

https://github.com/SeleniumHQ/selenium/tree/master/javascript/webdriver

webdriver.js link is obsolete – Alexander K Jun 8 '16 at 1:16

Fixed the first link, the second one seems to have vanished completely. – 0x89 Jun 8 '16 at 8:06

Russian language documentation

Selenium documentation is available here.

List of the selenium drivers together with
documentation:

- C#
- Java
- Python
- Ruby

You can download different Browser drivers from
here.

Welcome. Please read How do I write a good answer? In particular as I look over the other answers here I notice that a lot of them have links in addition to directions on how to find the documentation. If your answer is intended as an update to those answers you might also indicate that. – Jason Aller Apr 22 '14 at 1:26

i think many has given api link already.

But just fyi

http://docs.seleniumhq.org/docs/03_webdriver.jsp is the link that has taught me more so just thought of sharing..

Thanks
